

# WELCOME TO THE FUTURE

Many roads lead to the same target. Creating new products, we take various routes to arrive at a design that makes a brand instantly recognizable and distinguishes it from the competition. And when our efforts are rewarded, we say: right on target.

## Curve

With three cover panel designs, eight unique finishes, five different materials, two colour options for switches, 35 dazzling colour choices, over 200 modular functions, innumerable design possibilities and an automated electronic system with a sleek infrared remote - Curve is the complete residential series. Its stunning looks, attention to detail and superior refinement will not only fascinate your senses but also releases the designer within you - making you create interiors that are stylish, comfortable and distinctly you!

#### Switch with Indicator

Thanks to the small, diffused, very thin clear lens with a backlit LED, you can now easily spot the controls in the dark. The LED throws just enough light to project a soft, reassuring glow. The light emitted is mild and tender on your eyes. It is so soothing, you can even use it in sleeping areas without being disturbed.

#### Digital Alarm Clock

Trust this charming little device to wake you up or remind you of an appointment. Just key in the time through its simple interface and it's ready to take charge! The resulting alarm goes on for a minute. With an illuminated crystal display that shows the date, time, and day, it's a necessity in every home.

#### Emergency Light

Armed with three AAA rechargeable batteries and LEDs, it's a weapon for those days when power misbehaves. It switches on automatically when power fails and switches off once power returns. A small push button allows you to control the device while the geometry of the reflector and the clear lens maximizes efficiency of the LEDs.

#### Torcia

It turns on automatically when power goes off. Pluck it out gently from its socket and you can use it as a portable torch lamp - the LED provides sufficient light to guide you along the path. The charger-base socket mechanism ensures that the rechargeable Ni-MH battery remains perpetually charged.

#### Electronic Door Bell

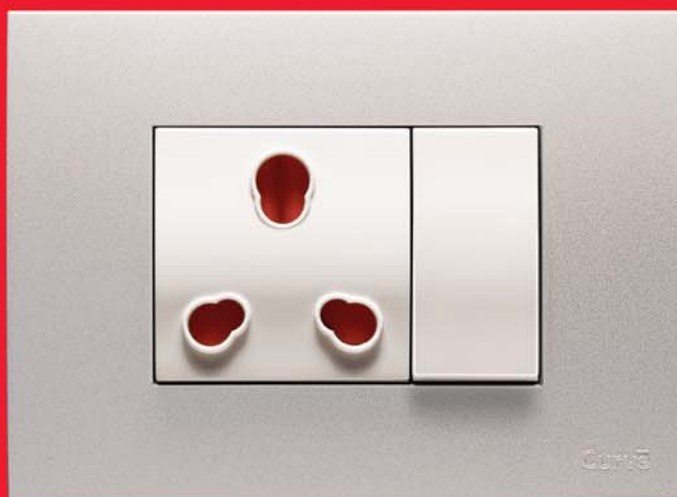

Unlike ordinary door bells that are fixed out of reach, the electronic door bells can be installed as modular inserts on your walls. This allows you to choose from the 32 melodious tunes/religious mantras any time you want. Equipped with three AAA rechargeable batteries, these bells can go on and on for years.

#### Step Marker

Step Markers light up your path along passages and stairs in incandescent style. The reflectors used maximizes efficiency of the LED while the prismatic lens ensures that light falls at the required angle. An accompanying switch lets you choose from three different intensity levels with ease.

## Colours and surfaces of modular inserts

### WHITE JAZZ

The inserts garbed in White Jazz bring in a soft soothing tone to their facade. Apart from unleashing a chaste wholesome aura, the glossy surface lavishes a minimalistic feel to the product, making it blend seamlessly with the surroundings. Its subtle charm touches the simplicity in you, creating a delightfully serene feeling. Opt for these inserts if austerity is your forte.

### VOLTAGE GREY

Voltage Grey, with its sombre tone, imparts a realistic feel to your interiors. Coupled with a distinct silky texture that's embellished with a matte finish, this urbane line of electrical fittings exudes technological and aesthetic refinement. Designed in a shade that's subtle yet unmistakably unique, Voltage Grey brings in a rare energy to your dwellings.

A low-angle, upward-looking photograph of a woman with blonde hair, wearing a peach-colored sports crop top and white leggings. She is captured mid-jump, with her arms raised and a joyful expression on her face. The background is a clear, bright blue sky. The text "Enabling 360 degrees of Freedom" is positioned on the right side of the image.

Enabling 360 degrees of  
Freedom

Whenever  
Wherever

#### **WIRELESS INFRARED SYSTEM**

All it takes is a few modules to convert your home or office into a world of wireless freedom. To begin right away, simply plug the modules into your existing installations! There are no new holes to be drilled or any additional wiring to be done. Once installed, press a button on the remote and an infrared signal transmits your command to one or many receivers in the room. Equipped with 14 channels, the remote can store all your switching needs with ease. You can also operate this system manually with a delicate touch on the receiver units. Futuristic in looks and broad in function, the wireless system lets you control your lightings, household appliances, drapes, fans, alarm systems and more in style.

*For those who live life on their own terms, anything less would be a compromise.*

#### Infrared Touch Switch

Sleek, trendy, and a joy to use, this device introduces a world of convenience at your fingertips! Just apply gentle pressure on the unit or the remote to operate any of your household devices. From fans to lighting needs to appliances, entertainment systems and more, these switches are equipped to power them all with ease!

#### Infrared Touch Dimmer

A gentle touch and they'll fill your interiors with brightness or a mellow glow! Equipped with TRIAC and a micro-controller chip, they control resistive loads up to 1000 W. Their unique Soft-start and Soft-end functions are eye-catching and ensure a longer life for the lamp. They even remember the intensity of light when you switch them off!

#### Infrared Fan Regulator

Step up to the next level of comfort and convenience with these devices! Equipped with digital display, these regulators allow up to nine levels of speed, ensuring better comfort and usage of power. The circuits used minimizes mechanical stress while the micro-controller chip remembers the speed level of the fan when you switch it off!

#### Infrared Drape Controller

You can now raise or lower your blinds in style with just a simple touch of a button on the unit or on the hand-held infrared remote. Equipped with relays and a micro-controller chip, this elegant control system is sure to elevate the sophistication quotient of your interiors.

#### Infrared Presence Detector

A wall-mounted device, it monitors an area up to 8 metres from its mounting plane and switches power ON/OFF depending on the presence or lack of movement at a certain brightness level. Convenient and safe, this device is ideal for areas where power could get wasted all day long!

#### Infrared Remote control

Futuristic in styling, the remote fits neatly into your hand. Equipped with 14 channels, you can assign all your switching needs to it in just 3 simple steps - without touching the frame or a single wire. And in case your needs change, you can alter the programming just as easily. It's so simple, anyone in the family can do it!

### WIRELESS FREEDOM WITH EASE

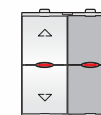

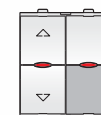

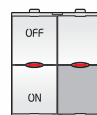

The Wireless Infrared System lets you control your lightings and other appliances with ease. A light touch on the remote transmits your command to the receivers which in turn switches that particular application on/off.

The receivers are similar to conventional inserts and can be installed in any of the Curve panels. They are available in one and two modules and can be operated manually as well as with the remote. Extremely simple to use, this system can even be plugged into existing installations without the need for additional wiring.

## Cristallo

cover plates

With Curve Cristallo, you can create style statements that echo your true self. Choose the clear, transparent Memorio panels to showcase your memories from the past. Select the specially crafted Twixos panels with two-tone colours to lend a distinct verve to your interiors. Or opt for the Illumino panels that emit a soft, gentle glow that inspires as well as guides you in total darkness.... Whichever your choice, the Cristallo range doesn't just allow you to express yourself more clearly, it sets trends for the rest to follow.

### Goldmedal

ISO 9001: 2000

Certificate no. IND96182

The awarding of the ISO 9001 certification guarantees that the activities carried out internally in the company are governed and controlled by procedures to ensure consistent level of quality.

Our vision of achieving higher standards of quality has earned us the coveted ISO 9001:2000 certification. The production units of Goldmedal Electricals have been assessed & approved by Bureau Veritas Quality International, London for maintaining International quality standards in every stage of production. Thereby assuring optimum consumer satisfaction with all safety regulations. Within the framework of the adopted technical standards, Goldmedal reserves the right to make all those changes (at any time and without prior notice) that, in its final judgement, are needed to improve the functions and performances of the products, as well as to meet the company's technological and production requirements.

The products listed in this publication should be installed by suitably qualified personnel in accordance with the requirements of relevant legislation, regulation and the accepted practice in the industry. Any further information which may be required about the use for which any specific product has been designed & tested, or about the conditions of use, are available on request. Consult your Goldmedal representative for the latest product information. All Government Taxes & levies are extra.

For any further information, or to make an order please contact our Distributors, Dealers & Architects from sales and technical staff who will be pleased to help you.

### GUARANTEE

Goldmedal follows internationally approved processes and conducts stringent quality control tests on every product that reaches you. In case of a manufacturing defect, Goldmedal guarantees to replace the products within 25 years for switches and sockets and 2 years for other wiring accessories. This guarantee is valid for products that have not been tampered and are installed in Goldmedal junction boxes as per Company instructions. This guarantee states the Company's entire liability and does not cover any consequential loss or damage or installation costs arising from the defective product.
