

lighting controls... simplified ! ...live more!

S² Transform

2ND
GENERATION
SWITCHING

A single action to create the magical aura

PG 01-02

Modern living is all about creating more from less. S2 Transform is a contemporary lighting control system which can transform the ambience of your room. A room can transform itself into many spaces by simply changing lighting in the room. The same room can give you different ambiances to suit the mood and the function of the room at that time. With S2 Transform, you can select upto 6 difference combinations of lights called **Scenes**. You can switch as well as dim different lights (Incandescent and Halogen) to create that perfect mood – all with the press of a single button. What's more, you can even add various fan speeds in those scenes for added comfort.

Simple to use and easy to install, the S2 Transform delivers more class, comfort & convenience in your home ...**live more!**

The Magic of S2 Transform

- Comfort and convenience of switching & dimming lights and pre-setting them in **Scenes**
- Users can create upto 6 such scenes for different lighting ambiances to match different moods
- Added comfort of fan speed regulation – either independently or as part of a **Scene**
- Usage of CBSC technology for fan speed control
- Control from either the Wall mounted Finger Touch Control Panel or the Sleek Remote Control
- Dimming of Incandescent and Halogen Lamps can give significant savings in Power

1 space... 6 ambiances

PG 03-04

Be it a precious moment of togetherness, a moment of enjoying sporting action, or a wonderful candle-lit dinner... celebrate those moments with the right ambience.

S2 Transform offers the choice of 6 different Scenes to match your mood.

IT'S A
CHILD'S PLAY

Easy to Operate and Program

PG 05-06

S2 Transform is easy to use program. The 6 Scenes can be easily reconfigured as per your changing requirements or moods and for various seasons.

- Single button programming
- Temporary manual override
- Auto retrieve last scene after power failure
- Auto standby function if not operated for 12 hours
- Indicator LEDs will power down after 10 seconds to save power
- 5 second exit delay on switching off
- Red LED on control panel for easy location and operation in the dark

A power-packed 3 board design of the S2 Transform packs in state-of-the-art SMT technology with Cap-sense controls using the most reliable and proven components – all to ensure a seamless performance through the product lifetime.
